

Skeleton Plane/Wireframe

The website will have four pages in the following format with the focus being on simplicity, consistency of colour and layout and priority on not overburdening the user with unnecessary functions, colours or images.

Landing page

Name of the database/Navbar
Call log listing with a dropdown function, a “completed checkbox” and the name of the engineer assigned to the callout.

Add Task page

Name of the database/Navbar
A form with the criteria and information to be gathered and added to insert a new callout to the database.

Manage categories page

Name of the database/Navbar
The ability to add or delete a callout category.

Search page

Name of the database/Navbar
Search functionality to search the database by customer name.
